SUDHANSHU YADAV

Bikaner, Rajasthan, India | +91 6367560406 | Sudhanshuyadav2019@gmail.com
linkedin.com/in/sudhanshuyadav2004 | github.com/sudhanshu2049

SKILLS

Languages: Java, Python, SQL, C++

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Flask

Tools: Git, GitHub, MySQL, Jupyter Notebook, VS Code

PROJECTS

2D Chess Game Aug 2025

Java, Swing, JDBC, MySQL, OOP

- Built a two-player chess application in Java using Swing, implementing full rule validation including check, checkmate, castling, and en passant detection.
- Applied OOP principles (inheritance, polymorphism, encapsulation) to design a modular class structure separating game logic, UI, and data layers.
- Integrated JDBC with a MySQL database to persist game history and player records, enabling save-and-resume functionality.

Smart Financial Analytics Dashboard May 2026

Python, Flask, Pandas, Plotly, Scikit-learn, MySQL

- Built a financial analytics dashboard using Flask and MySQL to visualize stock market trends and price movements.
- Implemented moving-average and volatility indicators in Pandas and NumPy to convert raw price data into actionable insights.
- Designed interactive Plotly visualizations enabling users to compare stock performance and identify trends.

Bankruptcy Prediction Model Jan 2026

Python, Pandas, NumPy, Scikit-learn

- Built a machine learning pipeline using Logistic Regression and Random Forest to predict corporate bankruptcy from ~7,000 records across 20+ financial features.
- Applied feature engineering and resampling techniques to address class imbalance and improve minority-class prediction reliability.
- Achieved ~86% prediction accuracy, identifying liquidity ratios and debt levels as the strongest bankruptcy indicators.

Sentiment Analysis Using LSTM Jul 2025

Python, TensorFlow, Keras, NLP

- Built an NLP sentiment classifier using LSTM networks trained on 10,000+ IMDB movie reviews.
- Tuned hyperparameters, including embedding size, sequence length, and dropout, to reduce overfitting and improve generalization.
- Achieved 85–90% classification accuracy, benchmarked against a logistic regression baseline.

CERTIFICATIONS

IBM Machine Learning Aug 2025

Cisco Python Essentials Nov 2024

IBM Data Visualization Aug 2025

ACHIEVEMENTS

- Built “Krishi Veda”, an AI-based agricultural solution, at a 36-hour hackathon (Gear Up Season 4, LPU).
- Selected participant in Microsoft Ideathon, focused on innovation and rapid prototyping.
- Silver Medalist in Lawn Tennis Tournament among 80+ participants.

EDUCATION

Lovely Professional University, Punjab, India Aug 2024 – Present

Bachelor of Computer Applications (AI & ML)

CGPA: 8.02 / 10

Shekhawati International Academy, Sikar, Rajasthan 2022

Class XII (CBSE)

Percentage: 75.8%
